PROFESSIONAL SUMMARY

BCS student specializing in Artificial Intelligence with strong foundations in Data Analytics, SQL, Python, and Power BI. Experienced in data cleaning, exploratory data analysis, dashboard development, and KPI tracking. Skilled in transforming raw datasets into actionable insights aligned with System Development Life Cycle (SDLC) principles. Passionate about leveraging data-driven solutions to support business decision-making and system optimization.

TECHNICAL SKILLS

Data & Business Intelligence:
SQL, Python (Pandas, NumPy), Power BI, Excel, Data Cleaning, Exploratory Data Analysis (EDA), ETL Processes, Data Transformation, Data Modeling, Predictive Analysis (Basic), Statistical Analysis, KPI Development

Growth & Marketing Analytics:
Google Analytics, Campaign Performance Analysis, Conversion Tracking, SEO Data Analysis, Reporting & Data Visualization

Web & Product Development:
React.js, JavaScript, HTML5, CSS3, WordPress Development, Responsive UI Design

AI & Automation:
AI Tools & Workflow Automation, AI-assisted Tagging, Prompt Engineering

Platforms & Tools:
Google Colab, Git, VS Code, Microsoft Excel, Microsoft PowerPoint, Microsoft Word

PROFESSIONAL EXPERIENCE

Digital Marketing Specialist
Saksham Real Estate & Investment Pvt. Ltd.
May 2025 – November 2025

- Managed multi-channel digital marketing campaigns, increasing engagement rate by 20%
- Increased website traffic by 15% through performance-driven campaign optimization
- Generated 70+ qualified leads per month through targeted paid advertising campaigns
- Reduced cost-per-lead by optimizing audience targeting and ad spend allocation
- Built interactive KPI dashboards tracking traffic, engagement, and conversion metrics, improving campaign performance visibility and reducing reporting time by 30%

PROJECTS

DShare – Hybrid Blockchain File Sharing Platform
Technologies: React.js, IPFS, MetaMask, AI Tagging

- Designed and developed a decentralized file-sharing platform with blockchain-based authentication for secure file access
- Implemented AI-powered file tagging system, improving file search efficiency by 40% during testing
- Reduced frontend page load time by 25% through component optimization and lazy loading
- Improved file retrieval speed by optimizing IPFS integration
- Built user interaction monitoring interface to track upload/download behavior

Expense Analytics Dashboard
Technologies: SQL, Python, Power BI

- Processed and analyzed 5,000+ transaction records using SQL and Python
- Identified spending trends leading to 15% potential cost optimization
- Built interactive Power BI dashboard tracking 6+ financial KPIs
- Automated reporting workflow, reducing manual reporting time by 30%
- Improved data accuracy by cleaning and normalizing raw datasets

MediCare – Healthcare Web Platform
Technologies: HTML, CSS, JavaScript, React

- Engineered a responsive multi-page healthcare platform with integrated appointment booking system, improving mobile usability by 30%
- Improved mobile responsiveness by 30% through UI optimization
- Integrated user behavior tracking to analyze engagement patterns, improving conversion flow and enhancing overall user interaction performance
- Reduced page load time by 28% through frontend performance optimization and lazy loading implementation

EDUCATION

Bachelor of Computer Science (Ongoing)
Institute of International Management Science (IIMS), Kathmandu
2022 – 2026
Relevant Coursework: Database Systems, Data Structures & Algorithms, Statistics, Software Engineering
Applied data analysis techniques using SQL and Python in academic projects.

Higher Secondary Education (+2)
GoldenGate International Secondary School
2020 – 2022
GPA: 3.09

CERTIFICATIONS

Data Analytics & Business Intelligence
Vrit Jobs Pvt. Ltd. | 2026

Digital Marketing (360)
Broadway Infosys Pvt. Ltd. | 2024

Drone Operation & Aerial Photography
Fotology Academy | 2025

AWARDS

- Winner – NCC 45th Batch Inter-Unit Football Championship
